

GOURU RAKESH

✉ rakeshgouru4@gmail.com ☎ +916301018813  LinkedIn  GitHub

Skills

Programming Languages

Python, Java, SQL, HTML, CSS, JavaScript

Databases

MongoDB, MySQL

QA & Testing

Functional Testing, Test Case Execution, Bug Reporting

Technologies

React.js, Node.js, Express.js, Bootstrap, REST APIs, Generative AI, Prompt Engineering.

Tools & Platforms

Postman, Git & GitHub, Canva, Power BI, Arduino

Experience

CGI, Mainframe Application Support Apprentice

02/2026 – Present

- Monitoring mainframe applications to ensure smooth system operations
- Identifying application errors and analyzing issues in production environment
- Working with mainframe tools and job monitoring (JCL, batch jobs, etc.)
- Supporting incident management and ensuring timely resolution of tickets

Bangalore

Projects

NeoTalks AI Chatbot

- Designed and developed an AI-powered chatbot using Python, Streamlit, and DialoGPT with real-time contextual understanding
- Optimized performance to improve response speed and overall system efficiency
- Implemented dual interaction modes to handle user inputs and system prompts effectively
- Improved response accuracy through testing and built an interactive, user-friendly interface using Streamlit

Grocery tracker

- Developed a responsive web-based grocery management system using HTML, CSS, and JavaScript
- Implemented CRUD functionality to efficiently manage items, categories, and shopping lists
- Integrated inventory tracking and expense monitoring features to improve spending control
- Enhanced user experience by designing an intuitive interface with efficient data handling

Automated Notary Document Generator (HTML, CSS, JavaScript)

- Designed and developed a web application to automate notary document generation using dynamic placeholders
- Engineered a menu-driven interface for structured data input and seamless document customization
- Enabled rapid, error-free, and print-ready document generation, improving operational efficiency
- Reduced manual effort and data entry errors through automation and optimized workflow design

Online Retail Store Database

- Designed and implemented a normalized MySQL database to ensure data consistency and scalability
- Optimized indexing and table relationships to significantly improve query performance
- Built efficient SQL queries for rapid sales reporting and real-time data access
- Enhanced inventory accuracy and system reliability through structured database design

Awards/Certificates

- AICTE by Edu-skills 10-weeks internships at celonis process mining.
- Leaf care: A system for detecting and cleaning plant dust
- Smart interviews coding 101
- Secured 1st place among 60 teams in the Smart India Hackathon for developing "Vintage Fit," an AI-driven fitness solution using posture analysis.

Education

Bachelor of Technology in CS (IOT)

2021 – 2025

Sphoorthy Engineering College (JNTUH)
